

Ashley Theimer

Woodstock, Maryland 21163 | 443.518.8199 | ashley@thetheimers.com | <https://ashleytheimer.github.io/>

Technical Skills

Languages & Tools: Java, Python (scikit-learn, pandas, matplotlib), JavaScript, HTML/CSS, PostgreSQL, Jupyter Notebooks, GitHub, Photoshop.

Software Development: Object-Oriented Programming, Algorithm Design, Agile Development, User-Centered Design, Code & Design Documentation.

Data & Databases: Data Analysis & Mining, Relational Database Design (ERD modeling, normalization).

Security & Emerging Tech: Cybersecurity Fundamentals, Information Security Principles, Large Language Models (LLMs).

Education

BA in Computing & Information Studies (CIS), Washington & Jefferson College (W&J).

Expected May 2026

Minor: Business Administration **GPA:** 3.881.

Washington, PA

Honor Societies: Phi Beta Kappa, Alpha Lambda Delta, Gamma Sigma Alpha

Major Achievements: CIS Steinberg Scholarship Recipient, Alpha Scholar, PAC Sportsmanship Team 2024

Extracurriculars: Kappa Alpha Theta Sorority Member, College Softball PAC Athlete

Experience

Washington County IT Department, Jail Meal Planning System (Capstone Project).

Jan - April 2026

- Developed a full-stack web application to digitize a manual meal planning system for recipe management, menu scheduling, inventory tracking, and nutritional analysis.
- Collaborated with 2 teammates, a non-technical client, and IT stakeholders to gather requirements and refine system functionality through iterative user testing.
- Designed and implemented a 1NF 11-table relational database with ERD modeling to ensure data integrity.
- Implemented input validation and structured forms to reduce user errors and maintain clean data.

W&J IT Governance Task Force Member.

Aug 2025 - April 2026

- Participate in monthly meetings with the Board of Trustees, faculty, and alumni to discuss institutional policies.
- Represent the student perspective on technology usage, data privacy, and student digital security.

W&J Peer Assisted Learning (PAL) Tutor.

Aug 2024 - April 2026

- Serve as the primary tutor for 30+ students per semester, providing targeted guidance, and debugging support.
- Coordinate with faculty to align tutoring with course goals and address student learning needs.

Lead Instructor, Assistant Instructor, BlackRocket, Carroll County, MD.

Summer 2024, 2025

- Instructed and sparked interest in computing and coding to 150+ summer camp participants aged 6-15.
 - Coded in new, different software mediums. Adjusted content to engage and educate camp participants.
-

Projects

Elementary School Classroom Library Database and Website, Personal Project.

May 2025 - Present

- Build a responsive, kid-friendly website with a database backend to manage a classroom library.
- Create a database (8 tables, 15+ backend functions, 1,000+ book records) that ensure data integrity.
- Design separate UIs tailored to the teacher client's requirements and user persona needs.

Simulation of Magic Kingdom Theme Park, Python Group Project Leader.

Fall 2024

- Built a discrete-time simulation of a park with 32 rides and 50,000 visitors using Python and Github.
- Facilitated team communication and code clarity to 6 members, assigned tasks to leverage strengths.
- Designed functionality and documentation for code structure, required functions, and data handling.

Volcanic Eruption Impact Analysis & Prediction.

Spring 2024

- Analyzed 835 volcanic eruptions using Python to identify relationships between explosivity, geography, and fatalities.
- Built Random Forest model to predict death ranges with 82% accuracy.
- Conducted statistical analysis and hypothesis testing, showing significantly lower deaths in modern eruptions.
- Visualized trends with Altair (boxplots, heatmaps, regression) to communicate insights on eruption risk factors.

UI of Fires In Pittsburgh.

Fall 2023

- Developed an interactive JavaFX map of 7,900+ real-world Pittsburgh fire incidents, filterable by type and year.
- Implemented object-oriented programming to parse, clean, and structure raw text data for the UI.
- Built dropdown menus, text input, and event handling with error checks that allow user interaction
